

## Security seal tag ties

### Technical data

#### Description

Security seal tag ties are used to prevent unauthorized access and manipulations.

Seal tag tie has a very effective hardened steel collet of unique design with the optimal number of petals and a cap which allows to control integrity of the collet when locked.

Security seal tag tie has a limited opening angle of the petals of the collet.

Reinforced cap reliably protects locking mechanism.

Security seal tag tie provides the highest level of protection.

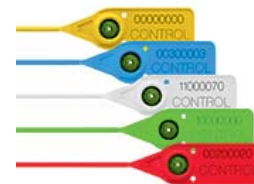

Additional protection is provided by the possibility of marking the seal ties at the request of the client  
Type of marking used on tag ties is laser marking.

#### Technical characteristics

- material polypropylene
- dimensions 300x28 mm
- work length of the tie 215 mm
- tie's diameter 3 mm
- temperature range of use from -50°C to +120°C
- colors : yellow, blue, white, green, red
- markings according to the client's request (name, logo, serial number, barcode...etc.)

#### Other

Yellow  
Blue  
White  
Green  
Red
